# THE CLOISTERS

Linking the past with the future – a modern venue in an ancient setting

The Cloisters venue opened in October 2015 as an extension to the ancient 14th century parish church of St Mary's in Stansted.

Set in the beautiful rolling countryside of the North Downs within Kent, in a designated conservation area, The Cloisters was built through fundraising by our small community to create a contemporary meeting place.

The Cloisters offers first class facilities comprising an attractive hall that can seat up to fifty people, a kitchenette and two toilets - one with disabled and baby changing facilities.

The Cloisters is an ideal venue for meetings, retreats, quiet days, music rehearsals and smaller events.

### THE HALL

The hall is light and airy, measures 6 metres by 10 metres and has comfortable seating for up to fifty people. There are also folding tables (each seating up to six people) and five small coffee tables which are suitable for less formal gatherings. An electric piano is also available for use on request.

### CATERING

The kitchenette is available for tea and coffee making and is equipped with a small microwave, dishwasher, fridge and mugs, plates, bowls, drinking glasses and cutlery for up to fifty people. Should you require outside catering there is a pub nearby that serves excellent homemade food or there are several local catering companies. Further details of catering options available upon request.

### IT FACILITIES

The Cloisters hall has excellent audio/visual facilities and free wi-fi connection - further details upon request.
